

Shenandoah -

This is a folk song, passed on to others by singing. You may have friends or relatives in other parts of the United States who know this song, but they may sing it a little differently than you do. It's a little like playing the game 'Telephone'. The original message often does not make it all the way around the circle. Usually it morphs into something funny or nonsensical. That can happen to a song, too, when it hasn't been written down.

Play Telephone with some friends. See if you can get the original message all the way around the circle with no changes. Good luck!
